

FEATURES

- Equipped with an inverter device for speed control. User can adjust how fast the cloth goes in and rolls out.
- Fabric tensions can be adjusted according to the fabric type, in order to eliminate stretching.
- An optical shaft encoder feedback device ensures great precision for calculating the length.
- Lighting sets allow easier inspection for defects and color mismatches on the fabric.
- Power Requirement: 220V, 50HZ / 60HZ, single phase. Simple switches for fast, easy and convenient operation.
- Automatic edge alignment function allows neat and efficient inspection of fabrics.

SPECIFICATIONS	FI-120
Power	220V, 50HZ / 60HZ (2.5KW)
Speed	0~75m/min
Max Fabric Diameter	50cm
Max Fabric Width	1800mm (72")
Dimensions	2500 x 1450 x 1900mm
Machine Weight	370Kg
Noise	<75db
